

Wonjun Han

Update: 2024.06.17

PERSONAL DATA

Email: filib@kaist.ac.kr / carlh@naver.com

Tel: +82) 10-2882-6228

Nationality: Republic of Korea

EDUCATION

Seoul National University(SNU)

March 2016 - February 2024

GPA: 3.51/4.3 | Major GPA: 3.43/4.3

B.S | Mechanical and Aerospace Engineering

RESEARCH EXPERIENCE

Healthcare Robotics Laboratory (Prof. Amy Kyungwon Han)

March 2024 ~ May 2024

- Internship Program
 - Vibration haptic feedback
 - Hyper-realistic, multi-sensory, and personalized surgical simulation

Artificial Intelligence and Robotics Institute Laboratory (PhD. Sungwook Yang)

April 2019 ~ December 2019

- SNU Graduation Research & Internship Program
 - Robot Hands, Bionic Arm Interface
 - "A Stiffness-controlled Robotic Palm based on a Granular Jamming Mechanism"

EXTERNAL ACTIVITIES

SNU College of Next-Generation Semiconductor Convergence Innovation

October 2022 – January 2023

- Research on Digital Piano Chips
 - To research the installation and operation of Carla in both a Linux laptop environment and an Odroid C4 environment for the use of Odroid C4 as a chip in a new type of digital piano

SNU Self-Built Car Club RuntoYou

August 2017 – September 2018

- KSAE University Student Self-Built Car Competition
 - Management for steering system(Steering system, Brakes, and Suspension) of Car
 - Assembly of all components

Autonomous Robotics and AI course

September 2022 – December 2022

- Deep Learning Model for Recognizing Rescue Requests for Alley Crimes using YOLOv5
 - Developed a deep learning model for recognizing specific behaviors in CCTV footage
 - Utilized YOLO v5 for training, employing motion history images from transformed CCTV footage

SKILLS

Programming Languages: Python(AI in Pytorch)

C, C++
MATLAB & Simulink
Solidworks

Language: Korean(native)
English(intermediate)
